

ATLET BS

Comprehensive joint nutrition with natural *Boswellia serrata* extract contributes to the reduction of symptoms of inflammatory processes and to the relief of pain.

Content of active substances per 1 kg:

Glucosamine sulfate – 400 g
Hydrolysed collagen – 300 g
Chondroitin sulfate – 150 g
Boswellia serrata extract – 65 g
Sodium hyaluronate – 9 g

600 g

Comprehensive joint nutrition for horses

ATLET BS is especially suitable for:

- nutrition, protection and regeneration of articular cartilage and tissue
- musculoskeletal pain relief
- improved mobility and greater physical performance
- deceleration up to preventing further deterioration of articular cartilage
- extension of the active age of animal
- improving the overall health condition

Glucosamine sulfate – NOURISHES

Glucosamine plays an important role in the metabolism of cartilage. It stimulates cartilage cells (chondrocytes) to synthesise proteoglycans (the basic structural components of cartilage), and is a major substrate for their production. Glucosamine is actively accepted by cartilage. Administration of glucosamine contributes to slowing down the development of already existing degenerative changes in cartilage.

Chondroitin sulfate – NOURISHES

Chondroitin sulfate is an important component of articular cartilage. It binds a large amount of water, thereby hydrating the cartilage, promoting the production of proteoglycans and reducing collagenolytic activity. Administration of chondroitin leads to a slowing down destructive changes in cartilage, relieve joint pain, improves mobility and relieves joint inflammation.

Hyaluronic acid – REGENERATES

Hyaluronic acid is found in all connective tissues, including joints, where it forms a major component of synovial fluid. Its administration normalises the properties of synovial fluid, acts against the degeneration of cartilage and restores its original properties.

Boswellia serrata – RELIEVES THE COURSE OF INFLAMMATION

The natural extract from *boswellia serrata* has anti-inflammatory effects and contributes to the relief and relief of pain. This natural extract has no effects on the digestive system. Regular use helps to prevent the destruction of articular cartilage.

Hydrolysed collagen – REGENERATES

Collagen is the main protein of elastic articular cartilage, ensuring its strength, elasticity and resistance. Lack of collagen leads to movement disorders and progressive degenerative changes.

Administer ATLET BS:

Before and after the racing season, during intense physical stress, to maintain proper functioning of the musculoskeletal system.

After orthopedic surgeries, in the event of osteoarthritis and musculoskeletal pain.

Dosage:

HORSE WEIGHT	INITIAL DAILY DOSE (THE FIRST 14 DAYS OF USE)		MAINTENANCE (CONTINUATION) DAILY DOSE	
100 kg	3.4 g	1 measuring glass	1.7 g	1/2 measuring glass
200 kg	6.8 g	2 measuring glasses	3.4 g	1 measuring glass
300 kg	10.2 g	3 measuring glasses	5.1 g	1.5 measuring glasses
400 kg	13.6 g	4 measuring glasses	6.8 g	2 measuring glasses
500 kg	17.0 g	5 measuring glasses	8.5 g	2.5 measuring glasses
600 kg	20.4 g	6 measuring glasses	10.2 g	3 measuring glasses

Method of use: The powder can be given with a small amount of food or feed, mixed with the grain or molasses, or administered directly into the mouth. Animals usually eat the product without problems.

Duration of use: Administer the product optimally for three months, then make a break for 1-3 months and repeat the administration.

Keep out of the sight and reach of children. For animals only.

Warning: ATLET BS oral powder contains natural apple pectin, the colour of which varies from white to light brown. For this reason, the colour of the powder in this product may differ. The colour change does not affect the quality or quantity of the active substances - glucosamine sulfate, chondroitin sulfate, collagen, sodium hyaluronate, or dry *boswellia* extract.
