

Cloruro De Potasio, 50ml

COMPOSITION

Potassium chloride	10g
CSP Vehicle	100 mL

Categories: Equine , Other , Veterinary

Description

PROPERTIES:

Potassium chloride is an electrolyte for parenteral use and acts to balance and/or restore potassium ions in the animal's body. Hypokalemia is an electrolyte imbalance characterized by a decrease in the level of potassium ions in the blood. It can be caused by sweating, diarrhea, vomiting, poor potassium intake, kidney disease, prolonged use of loop diuretics such as furosemide, or other dehydration processes.

INDICATIONS:

Potassium restorer for the body.
Prevention and correction of hypokalemia.

ADMINISTRATION AND DOSAGE

0.5 to 1 g of Potassium Chloride per 100 kg of body weight.
Horses: 25 to 50 mL in 1 liter of physiological saline by slow infusion, via IV.

PRESENTATION

50 mL vial
