

Oral gel for
respiratory
support and
against muscle
fatigue of the
horse

FRESH HORSE

oral gel

INDICATION

Product with a unique combination of LACARTIN 5 active substances containing oils of peppermint, anis and eucalyptus to facilitate and support breathing, and L-carnitin to spare muscle glycogen and reduce lactate build-up in muscles causing muscle fatigue. The medicinal product comes in the form of sweet, tasty and easy-to-administer gel.

COMPOSITION

1 applicator contains:
L-carnitin 4.5 g, peppermint oil, anise oil, eucalyptus oil, silicon dioxide, sucralose, honey, water, sodium methylparaben, sodium propylparaben.

Oral gel.

TARGET ANIMAL SPECIES

Horses.

DOSAGE AND METHOD OF ADMINISTRATION

The applicator contains one dose – 12.4 g.

Administer one applicator 15–25 minutes before mounting the horse (show jumping, race horses, reining, dressage, etc.). In other cases 15–25 minutes before starting the sports performance of the horse.

Squeeze the applicator contents at the back of the tongue by single pushing the piston.

This medicinal product does not contain any doping substances.

Before application, remove the cap from the applicator by bending it slightly to one side.

STORAGE

Store at temperatures below 25 °C.

Protect from frost.

SHELF LIFE

2 years.

PACKAGE

1×12.4 g.
