Horse & Foal

Advanced Gut Health Support

Revolutionising Equine Gut Health

Precision Microbes Horse & Foal is a scientifically formulated complementary feed designed to optimise gut health and overall well-being. Trusted by veterinarians and horse owners, it supports digestion, immunity, and recovery.

Why Choose Precision Microbes?

- **Optimises Digestive Health**
Supports microbiome balance for advanced nutrient absorption
- **Competitive Inhibition**
Competes with bad bacteria within the gut to maintain a balanced microbiome
- **Supports Immunity**
70% of the immune system is based in the gut! Supporting the gut supports a stronger immune response
- **Aids in Recovery**
Supports horses after stress, antibiotic use, or digestive upsets
- **Highly Palatable & Easy to Administer**
Can be given in feed or orally

Targeted nutritional support for foals, active horses, and during recovery

- **Performance Horses**
Supports gut health during times of stress and during travel
- **Foals**
Helps early gut development & digestive stability
- **Horses in Recovery**
Aids after illness, dietary upsets, or medications

Long-term use pony	70ml	Mix in feed or orally
Young foal	50ml	Oral administration until eating solids
Weanling	50ml - 100ml	Mix in feed or orally

What vets & owners saying say about Precision Microbes

“Within a few weeks of using it on a yearling recovering from surgery, the difference was clear—his chest widened, his coat improved, and his temperament became noticeably calmer, even on box rest. After that success, we started using it on sales horses, and so many people commented on their coats, and they strengthened up whilst doing conditioning work ahead of sales. Now, we’ll be using it on more yearlings and foals. What you put in is what you get out—give them everything nutritionally to support their gut and give them every chance.”

Michelle Motherway, TDM Bloodstock

“Within a month, the transformation has been clear—huge benefits in horses’ temperaments, and they seem noticeably happier. While it may seem like an added cost, in the long run, it’s not. It truly works, and we have all our horses on it.”

Danielle Hurley, Woodlands Lodge, Middleton, Co. Cork

“I initially used Precision Microbes for foal digestive disturbances and then began incorporating it for older animals that had historically been poor doers or had experienced gastric issues. I started using it with our own stock at home and saw excellent results. It’s great to have first-hand experience backing up a product, making it easy for me to recommend to clients. It’s simple to administer, highly palatable, and safe for animals of all ages.”

Dr. Ciara Barrett MVB, Faxbridge Veterinary, Co. Cork and Dunmore House Sport Horses

“A game changer for my horse prone to painful digestive upsets – keeps condition on while in work and makes him much happier to ride.”

Damien Griffin, Lissyegan Stables

“Precision Microbes is a valuable digestive health supplement for horses. Client feedback has been fantastic, with many reporting improvements in their horses’ condition, coat quality, and overall well-being. Horses appear happier and healthier while on it.”

Dr. Shane Stafford MVB, Director & Veterinary Surgeon Royal Equine Vet Care

Available in 1L, 5L & 20L
