

HYDRATONIC GEL

ELECTROLYTE BALANCE

Dietetic complementary feed. Compensation for the loss of electrolyte in case of heavy sweating.

Athletic horse

FROM RESEARCH
Paskacheval

Aloe vera, electrolytes, vitamin E

USES

	DOSAGE	FREQUENCY
Before the event	2 syringes	1 for morning and 1 for evening
After the event	1 syringe	Renewable after 1 hour
Next days	2 syringes	1 for morning and 1 for evening

Water must be available for at least 20 minutes or preferably for 1 hour post administration. It is advisable to ask for the opinion of an expert in feed before using this feed or to extend its use

PRODUCT ADVANTAGES

- › Restores electrolyte balance lost during intense sweating or physical exertion
- › Enriched with vitamin C, E and glycine to support recovery and hydration
- › Practical oral gel format, easy to administer before and after performance

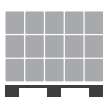

TIPS FROM PASKACHEVAL

Heavy sweating during effort causes a loss of vital electrolytes like sodium, potassium, and magnesium. This gel helps maintain hydration and supports muscle and nerve function after exertion. Ideal for athletic horses needing fast recovery after intense exercise or hot weather.

RAW MATERIALS

Sodium chloride, Potassium chloride, Magnesium chloride, Glycerin, Aloe Vera

Additives (/kg)		Nutritional values (%)	
3A-VITAMINS		Crude Protein	< 0,1%
Vitamin C (3a300)	10 000 mg	Crude Fat	< 0,1%
Vitamin E (3a700i)	10 000 mg	Crude Ashes	39%
2B-FLAVOURINGS		Crude Fiber	< 0,1%
Glycine (2b17034)	10 000 mg	Natrium	8,70%
		Chlorure	18,90%
		Potassium	4,60%
		Calcium	<0,1%
		Magnesium	0,40%
		Phosphorus	<0,1%
		Moisture	60,00%

Palletization:

Syringes of 30 ml : 100 units per packaging
/ 4000 units per pallet

Made in France
