PALATABLE!

ITRACONAZOL ORAL SUSPENSION ZOOVET

zoovet

Itraconazole 1 %
Antimicrobial - Antifungal

FORMULA: Itraconazole 1.0 g; Vehicle q.s. 100 ml.

INDICATIONS: Antifungal for systemic mycoses.

DOSAGE: Administer 0.5 to 1.0 ml per kg bw. This is equivalent to 5-10 mg / kg of itraconazole.

Interval between doses: 24 hours.

Treatment duration: The duration of treatment is variable, depending on the type of fungal affection and veterinarian's criterion. However, a minimum treatment of 30 days is recommended.

SPECIES: Dogs and cats.

ADMINISTRATION ROUTE: Oral.

CONTRAINDICATIONS: Do not administer in animals previously recognized as hypersensitive to any of the components of the product or to other azoles. Do not use in pregnant or lactating females. Do not use in

conjunction with antacids. Do not use in patients with impaired liver function.

CAUTIONS: Mainly in prolonged treatments or when using the highest dose (10 mg / kg), check for collateral signs as hepatotoxicity (anorexia, increased liver enzymes, vomiting), vasculitis, skin ulcers or members edema. In these cases it is recommended to suspend treatment or using a lower dose (lower doses or longer intervals).

STORAGE: Store between 15°C and 30°C, away from direct sunlight, in a hygienic place, keeping its original container and safety system intact.
