

TENDI'PROTEC +

TENDONS FLEXIBILITY

Mix of aromatic substances and plant extracts in order to support tendons and ligaments.

The use of TENDI'PROTEC + is recommended on horses with tendons and ligaments in high demand.

Athletic horse

Blackcurrant, willow, bamboo, horsetail (by maceration of plants)

USES

	DOSAGE PER DAY	FREQUENCY
Horses	50 ml	20 days
Ponies and foals	25 ml	20 days

The simultaneous use of different organic acids or their salts is contraindicated when one or more of them are used at or close to the maximum permitted level.

PRODUCT ADVANTAGES

- > Supports tendon and ligament health
- > Ideal for recovery support

TIPS FROM PASKACHEVAL

Horse tendons play a crucial role in biomechanics by connecting muscles to bones and transferring force for movement. Made primarily of collagen fibers, they provide both elasticity and strength, allowing horses to run, jump, and perform complex movements. Their structure enables energy storage and release, reducing muscle fatigue and enhancing movement efficiency.

RAW MATERIALS

Blackcurrant, Willow, Bamboo, Horsetail (by maceration of plants).

Additives (/L)		Nutritional values (p.cent)	
2B-FLAVOURINGS		Crude Ashes	0,40%
Aromatic substances		Crude Protein	0,00%
Ethanol (2b02078)	35 545 mg	Crude Fiber	0,30%
1A - CONSERVERS		Crude Fat	0,00%
Formic acid (1k236)	10 360 mg	Natrium	0,20%
Propionic acid (1k280)	3 020 mg	Moisture	92,00%
