

ALAPTID veterinary product

**ALAPTID
veterinary product**

ointment to support healing and
regeneration processes

Composition: Alaptide ointment base
– Polysorbate 60, Cetostearyl alcohol,
Paraffin oil, Propylene glycol,
Methylparaben, Propylparaben, Water for
injections.

Characteristics of the product:

Alaptide (spirocyclic synthetically prepared
dipeptide) stimulates the growth of
granulation tissue, accelerates the
epithelisation process and the course of
healing of superficial wounds.

Use:

A cosmetic veterinary product, which can
be used in all warm-blooded non-food
animals to treat mild injuries to the skin
membranes, burns, excoriations, frost bites,
pressure ulcers, acid burns in canine
footpads from salt in the winter period, etc.

Method of use:

Externally on skin. Apply the ointment in a
layer of 2-3 mm on the skin site; possible
slightly wrap with a bandage and keep on
site for the required period to support
wound healing with occasional controls. In
cases, when bandage cannot be used, the
ointment is applied 2 times a day or as
required. The application period depends
on the extent of injured site and the
regeneration state. The usual application
length varies from 3 – 10 days; longer in
chronic neglected cases.

Caution:

Do not use the product after the expiration
period indicated on the packaging.

Precautions:

Keep out of the sight and reach of children.

Storage:

At the temperature from 10 °C to 25 °C.

Shelf life:

3 years from the date of production. Use
within 28 days after the 1st opening.
