

ATLET MSM

Comprehensive joint nutrition

Content of active substances per 1 kg:

Glucosamine sulphate – 355 g

Chondroitin sulphate – 133 g

MSM – Methylsulfonylmethane – 444 g

700 g

Comprehensive joint nutrition for horses.

ATLET MSM oral powder is recommended to:

- foals from 2 months of age
- reduce the risk of musculoskeletal disorders
- sports and working horses of all ages

ATLET MSM oral powder is especially suitable:

- for nutrition, protection and regeneration of joint cartilage and tissues
- to relieve musculoskeletal pain
- to improve mobility and for greater physical performance
- to slow down further damage to articular cartilage
- to extend the animal's active life
- to improve overall health

Glucosamine sulphate – NOURISHES

Glucosamine plays an important role in the metabolism of cartilage. It stimulates cartilage cells (chondrocytes) to synthesise proteoglycans (the basic structural components of cartilage) and is a major substrate for their production. Glucosamine is actively accepted by cartilage. Administration of glucosamine contributes to slowing down the development of degenerative cartilage changes that have already occurred.

Chondroitin sulphate – NOURISHES

Chondroitin sulphate is an important component of articular cartilage. It binds a large amount of water, thereby hydrating the cartilage, promoting the production of proteoglycans and reducing collagenolytic activity. Administration of chondroitin contributes to slowing down destructive changes in cartilage, alleviating joint pain, improves mobility and moderates the course of joint inflammation.

MSM – HELPS REDUCE INFLAMMATION AND PAIN

MSM is a substance containing organically bound sulphur which helps strengthen ligaments and tendons, relieve inflammation and pain and regenerate and relax muscles. It also has strong antioxidant and other beneficial effects and is a unique source of sulphur compounds, which have positive effects on the body, especially on a damaged articular cartilage. MSM also helps improve the hoof horn and the quality of coat.

Dosage:

HORSE WEIGHT	INITIAL DAILY DOSE (FIRST 14 DAYS OF USE)		MAINTENANCE (CONTINUATION) DAILY DOSE	
100 kg	4.5 g	1 measuring cup	2.25 g	1/2 measuring cup
200 kg	9.0 g	2 measuring cups	4.50 g	1 measuring glass
300 kg	13.5 g	3 measuring cups	6.75 g	1.5 measuring cups
400 kg	18.0 g	4 measuring cups	9.00 g	2 measuring cups
500 kg	22.5 g	5 measuring cups	11.25 g	2.5 measuring cups
600 kg	27.0 g	6 measuring cups	13.50 g	3 measuring cups

Method of use: The powder can be administered with a small amount of feed, mixed with the grain or molasses, or given directly into the mouth. Animals usually eat the product without problems.

Duration of use: Administer the product optimally for three months, then make a break for 1-3 months and repeat the administration.

Keep out of the sight and reach of children. For animal treatment only.

Warning: ATLET MSM oral powder contains natural apple pectin, the colour of which varies from white to light brown. For this reason, the colour of the powder in this product may differ. The colour change does not affect the quality or quantity of the active substances – glucosamine sulphate, chondroitin sulphate and MSM.
