

Complejo B Injectable

Composition per mL

Vitamin B1: 12.5 mg; Vitamin B2: 1 mg; Vitamin B6: 2.5 mg; Vitamin B12: 1.25 µg; Nicotinamide: 10 mg; Calcium pantothenate: 25 mg.

Pharmacological properties

Association of group B vitamins.

Indications and target species

Cattle, sheep, goats, pigs, poultry, horses, dogs and cats.

Treatment or prevention of diverse disorders caused by vitamin deficiency, such as nervous system alterations: polyneuritis, ataxia, myelitis; digestive disorders: abnormal peristalsis, diarrhoea, necrotic enteritis, skin disorders and anaemia.

It is a fast and effective reconstituent indicated for weakened animals, especially after infections, pregnancy, parturition, intestinal disorders and in cases of stress due to transport or change of diet.

Dosage and administration route

Intramuscular administration.

- **Cattle and horses:** 5-10 mL/animal/day.
- **Poultry:** 0.5-1 mL every 24 hours.
- **Sheep, goats and pigs:** 2-5 mL/animal/day.
- **Dogs and cats:** 0.1-1 mL/animal/day.

The duration of treatment is 3-5 days.

Withdrawal period

Not required.

Vials of
100 mL & 250 mL
