

BIOVITAION

COMPOSITION

Magnesium aspartate	1500 mg
Potassium aspartate	1200 mg
Cyanocobalamin	50 mg
Sodium Selenite	100 mg
ATP	150 mg
Vehicle q.s.	100 mL

Categories: Energizers, Equines, Veterinary, Vitamins

DESCRIPTION

MUSCULAR DYNAMIZER AND ENERGIZER

PROPERTIES

biovitaion is an injectable combination of magnesium aspartate, potassium aspartate, vitamin B12 (cyanocobalamin), adenosine triphosphate (ATP), and sodium selenite, which helps restore and optimize muscle function in animals. It increases muscle work capacity and resistance to fatigue. It promotes the elimination of toxic waste products from muscle activity. It helps replenish the animal's energy reserves and invigorates productivity.

INDICATIONS

Muscle stimulant, restorative, and mineral energy supplement. Indicated for animals subjected to intense exertion. Recovery from muscle disorders, loss of appetite, weakness, and lethargy. Fatigue and overexertion syndrome in competition horses.

DOSAGE:

It is recommended to administer for 15-day periods as a supplement, or as prescribed. Administer by slow intravenous or intramuscular injection. Oral administration may be used if deemed appropriate. Horses and cattle: 10 mL daily or 20 mL every other day by slow intravenous or intramuscular injection for 5 to 10 days. Sheep, swine, and goats: 5 to 10 mL. Dogs and cats: 1 mL per 5 kg of body weight.

PRESENTATION

Multidose bottle containing 100 mL.
