

Registration Number: Q-7972-209

Non-steroidal anti-inflammatory

Solution for injection

FORMULATION

Fenilbutazone.....200mg
Vehicle q.s.....1 ml

INDICATIONS

Butafen, is a non-steroidal anti-inflammatory drug with an analgesic and antipyretic effect, which inhibits the synthesis of prostaglandins that participate as chemical mediators of pain and inflammation. It plays an important role in the inhibition of cyclooxygenase which participates in the development of inflammatory, painful and febrile reactions..

Butafen, relieves pain, reduces swelling and tenderness and increases mobility in patients with rheumatic disorders. In horses, it is used in the treatment of traumatic arthritis, acute lung infections, musculoskeletal conditions, dislocations, tendonitis and trauma..

SPECIES

Equines (not intended for human consumption).

DOSES

1 ml per each 45 kg of body weight (equivalent to 4.4 mg per kg of weight of phenylbutazone) every 24 hours for 3 to 5 days at the discretion of the Veterinarian.

ROUTE OF ADMINISTRATION

Slow intravenous

PRESENTATION

100 ml Bottle

WARNINGS AND/OR RESTRICTIONS

Do not administer to horses intended for human consumption.

The injectable preparation should not be administered intramuscularly or subcutaneously, because it is very irritating.

Intracarotid injections may cause central nerve stimulation and seizures.

Therapy should be suspended at the first signs of any toxic reaction (e.g., anorexia, oral lesions, depression, reduction in plasma proteins, increase in serum creatinine, leukopenia or anemia).

Do not use in pregnant females.

Keep in a dry, cool place within a range of 15-30°C and protected from direct sunlight.

Do not leave it within the reach of children and pets.

Any unused veterinary medicine, waste derived from it and empty containers must be disposed of safely and in accordance with local regulations, avoiding contamination of water sources. Product for exclusive use in Veterinary Medicine.
