

Copper Booster Paste

35gm, 30ml - Artimon

A chelated copper oral paste formulated to support optimal copper levels, enhance coat condition, and promote overall vitality in livestock and equines.

How to Use:

Description

Copper Booster Paste by Artimon is designed to address copper deficiencies in animals, which can lead to anemia, poor coat quality, and decreased fertility. Its formulation includes:

Chelated copper for improved bioavailability

Zinc and iodine to support immune function and thyroid health

This combination ensures efficient absorption and utilization of essential trace minerals, supporting various physiological processes and overall well-being.

Usage:

Administration Route: Oral paste administered directly into the mouth.

Dosage:

Foals and yearlings: ½ syringe every 7–14 days.

Adult horses and camels: 1 full syringe every 7–14 days.

Calves and yearlings: ½ syringe every 7–14 days.

As a dietary supplement:

Horses and camels: 5 mL daily.

Foals and calves: 2.5 mL daily.

Benefits:

Corrects copper deficiencies, preventing anemia and supporting red blood cell production.

Enhances coat color and quality.

Supports immune system function and reproductive health.

Promotes proper growth and development in young animals.
