

DERBY® Vitamin E / Selenium

DERBY® Vitamin E / Selenium is a complementary feed for horses. Vitamin E and organically bound selenium are essential antioxidants that help protect muscles from oxidative stress.

Oxidative stress places a particular strain on muscle metabolism during periods of increased physical exertion, intensive training or competition. Vitamin E helps protect muscle cell membranes from damage caused by free radicals, while selenium works synergistically with vitamin E to support normal muscle function.

Thanks to its organic form, selenium is highly bioavailable and can be efficiently absorbed by the body. As a result, **DERBY® Vitamin E / Selenium** may help reduce the risk of muscle soreness and support faster recovery after physical exertion.

ADMR-compliant formulation.

Feeding recommendation

DERBY® Vitamin E / Selenium is fed together with concentrated feed.

Moderate work:

- 200 kg body weight – **5 g per day**
- 400 kg body weight – **15 g per day**
- 600 kg body weight – **25 g per day**

Heavy work:

- 200 kg body weight – **10 g per day**
- 400 kg body weight – **20 g per day**
- 600 kg body weight – **30 g per day**

Maximum daily amount:

- 200 kg body weight – **20 g per day**
- 400 kg body weight – **40 g per day**
- 600 kg body weight – **60 g per day**

The enclosed measuring cup (30 cc) corresponds to approx. **24 g** of product.

Important: due to the content of organically bound selenium, **DERBY® Vitamin E / Selenium** must not exceed **1 % of the total daily ration**.

Nutritional additives per kg:

- Vitamin E (3a700) – **35,000 mg**
- Selenium (organic form from *Saccharomyces cerevisiae* CNCM I-3060 / inactivated selenium yeast, 3b8.10) – **20 mg**
