

NOTICEABLE AND FAST EFFECT

Before applying
the gel Fitodoc®

After the course of using
gel Fitodoc®

Application tips

Use dental gel Fitodoc® **2-3 times a week**
in the following doses:

- cats, small dogs — 1-3 cm of gel
- medium dogs — 3-5 cm of gel
- large dogs — 5-7 cm of gel

For healing of soft tissues of the oral cavity **after ultrasonic teeth cleaning**, dental gel is used in animals 2 times a day for 5-7 days in the doses indicated above.

Trust the care of your pets' health!

Beauty and health

Fitodoc®

Dental gel

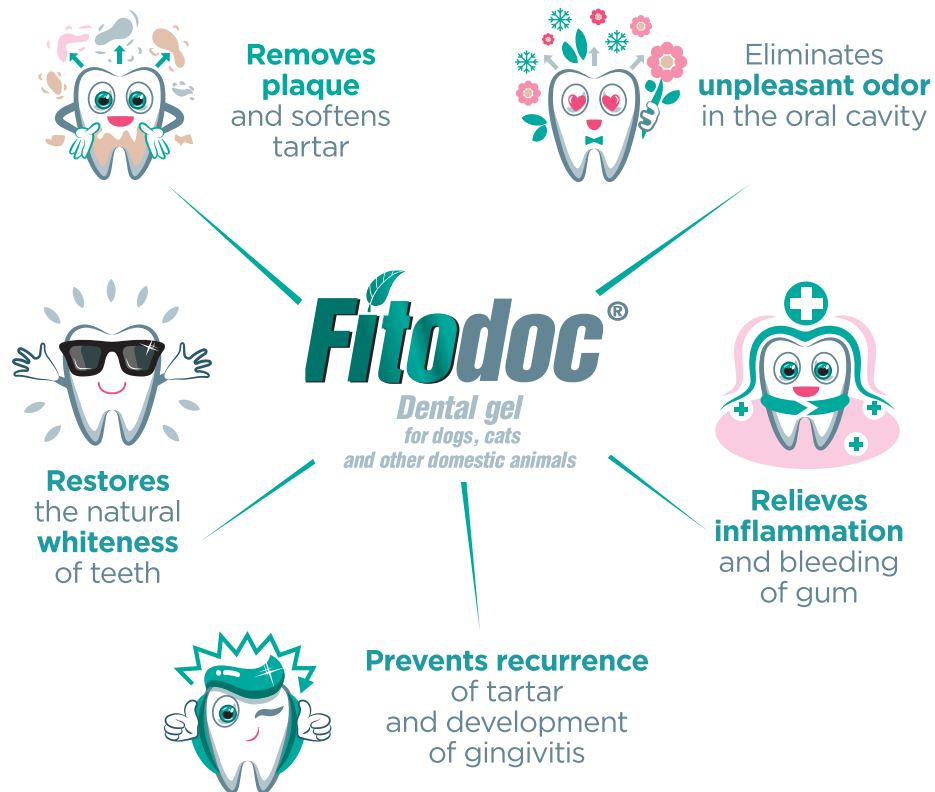

For oral
care of dogs, cats
and other small animals

- ✓ Natural composition
- ✓ Removes plaque
- ✓ Eliminates odor and bacteria
- ✓ Restores teeth whiteness
- ✓ Prevention of gingivitis

Almost every pet suffers from oral diseases!

According to veterinarians, **MORE THAN 80% OF DOGS AND CATS** have problems in the oral cavity, which can lead to lack of appetite and exhaustion, pain and gastrointestinal diseases, tooth loss and chronic gum inflammation.

Dental gel Fitodoc® **COMBATS 5 MAIN PROBLEMS** in the oral cavity:

Natural ingredients for a brilliant result!

BROMELAIN AND PAPAIN

Plant-based enzymes that actively break down plaque without damaging enamel. Safe to swallow.

A SPECIAL COMBINATION OF PLANT EXTRACTS

green tea leaves, chamomile, calendula, mint have an antiseptic, deodorizing effect, soothes inflamed mucous membranes.

UNIQUE COMPLEX OF COPOLYMERS

ensures adhesion (sticking) of the gel mass to the teeth, which allows the active substances to effectively act on dental plaque for at least 30 minutes
