

FLOR'CONTROL

DIGESTIVE SUPPORT PASTE

Syringe to facilitate the physiological digestion, in case of risks of digestive disorders (diarrheas).

BREEDING

Alchemilla, charcoal,
electrolytes

GEL

SYRINGE

USES

	DOSAGE PER DAY	FREQUENCY
Foals	10 ml (½ syringe)	Twice a day for 2 days
Adults	20 ml (1 syringe)	Twice a day for 7 days maximum

The simultaneous use of different organic acids or their salts is contraindicated when one or more of them are used at the maximum permitted level or at a level close to it.
Do not use this feed for any other species.

PRODUCT ADVANTAGES

- Reduces digestive disorders thanks to a targeted combination of charcoal, bentonite, and plant extracts
- Provides essential electrolytes (Na⁺ & K⁺) to prevent dehydration during digestive stress
- Easy-to-use oral syringe for fast, effective digestive support in foals and young horses

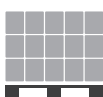

TIPS FROM PASKACHEVAL

Charcoal supports gut balance by adsorbing harmful substances before they can disrupt digestion. Bentonite contributes to digestive comfort by creating a protective film and Alchemilla soothes the digestive tract.. Electrolytes help stabilize internal function during periods of digestive upset

RAW MATERIALS

Charcoal, glycerin, alchemilla*, sodium chloride, potassium chloride.
*From the transformation of crushed plants

Additives (/kg)	Nutritional values(%)
1I-ANTI-CAKING	Crude Protein 0,80%
Bentonite (1m558i) 200 000 mg	Crude Fiber < 0,10%
2B-FLAVOURINGS	Crude Fat < 0,10%
Aromatic substances	Crude Ashes 15,00%
1A - CONSERVERS	Natrium 0,40%
Potassium sorbate (1k202) 4900 mg	Potassium 0,40%

Palletization:
syringe of 20 ml :
400 units per pallet /
10 units per packing

Made in France
