

FRUCTOSE 50 R

COMPOSITION

Fructose	50 g
Ascorbic Acid	6 g
Vehicle q.s.	100 mL

Categories: Energizers, Equines, Supplements, Veterinary, Vitamins

DESCRIPTION

ENERGETIC – DETOXIFYING

PROPERTIES

Fructose is a simple carbohydrate (sugar) with high energy value, non-insulin-dependent metabolism, which can replace glucose and is easily utilized. It provides an immediate energy boost for intense muscle work, significantly increasing performance and mitigating the feeling of fatigue caused by exertion, as it accelerates the elimination of metabolites derived from muscle work, such as lactic acid.

Ascorbic Acid (Vitamin C) stimulates the immune system and the general nervous system. It helps correct and prevent metabolic imbalances caused by stress, ensuring optimal performance.

INDICATIONS

Antioxidant, energizer, detoxifier, and hepatoprotective agent. Primary fuel for muscle contraction. Provides rapid energy to improve athletic performance. For poisoning, liver disease, and muscle fatigue. Stimulates the immune system.

ADMINISTRATION AND DOSAGE

Cattle, horses and sheep: 25 to 50 mL daily via slow IV infusion.

PRESENTATION

100 mL and 250 mL vials
