CONSULT WITH YOUR VETERINARIAN

**MEDICAL PRESCRIPTION IS
NECESSARY FOR SELL**

INDICATIONS:

For the specific treatment of coccidiosis in canines and felines, frequently associated with giardias. Treatment of intestinal infections caused by germs sensitive to dimetridazole and sulfadimethoxine.

SPECIES:

Canines y Felines.

DOSES:

1 tablet per kg of body weight (25 mg of sulfadimethoxine and 16.5 mg of dimetridazole), twice a day for 10 days. In case of severe infection, the dose of the first dose can be doubled, in order to obtain a high attack dose in the blood, which will be maintained later for or up to 15 days. The daily dose according to the weight of the animals can be administered in a single dose in the case of treatments of intestinal infections or only of coccidia.

ROUTE OF ADMINISTRATION:

Oral

WARNINGS AND/OR RESTRICTIONS:

Its use is prohibited in animals intended for human consumption or in any other animal species other than those approved on this label.

Sulfas should not be administered with other bactericidal antibiotics, or with aminoglycosides. Do not administer with calcium or antacids to decrease intestinal absorption. Do not administer dimetridazole for more than 20 days. Do not administer during pregnancy. In case of sensitivity to the components, discontinue the medication. It is recommended to take breaks of 20 days to repeat the medication. Administer with plenty of water.

Store in a cool, dry place at no more than 30 ° C and protected from sunlight. Keep out of reach of children, pets and disabled people.

Product for exclusive use in Veterinary Medicine.
