

Grow Up Vital

Grow Up Vital is a highly absorbable vitamin and mineral complex designed to support the healthy development of young horses. It enhances vitality, strengthens hooves, improves coat and skin quality, and provides essential nutrients for the musculoskeletal system, including glucosamine, chondroitin and collagen.

DESCRIPTION

Grow Up Vital is formulated to supply essential nutrients needed for proper growth. This complete set of vitamins and minerals is enriched with key compounds that support joint and bone health:

- Glucosamine & Chondroitin – essential components of synovial fluid, ensuring proper joint nourishment.
- Type II hydrolyzed collagen – a natural protein that strengthens connective tissue, improving flexibility and durability. Supplementing collagen during growth prevents cartilage deficiencies, enhances mineral absorption and increases bone density. A well-balanced vitamin and mineral profile prevents deficiencies that can lead to weakened immunity, developmental issues, brittle hooves, dull coats, loss of appetite and lethargy.

Recommended when:

- No access to pasture (seasonal or year-round)
- Poor-quality diet components
- Diet primarily based on hay and oats
- General weakness or developmental concerns

Key benefits:

- Supports foals (from 3 months), weanlings, and young horses
- Promotes healthy musculoskeletal growth
- Enhances hoof, coat, and skin quality Increases energy and vitality
