Coats, Manes & Tails

NATURALLY HEALTHY | CONCENTRATED | MIX 8 TO 1

Healthy HairCare Hair Moisturizer™ is a hair and skin moisturizer that assists in replacing vital oils to coats, manes and tails. When used daily, **Hair Moisturizer™** helps control dandruff, dry skin itching and flaking while promoting a healthy, natural shine. **Hair Moisturizer™** is recommended as a daily grooming aid, after body clipping or bathing and to repair dry, brittle or sun-damaged coats, manes and tails. Works great as a touch-up spray before entering the show ring, too.

Directions: Combine 1 part **Hair Moisturizer™** with 8 parts water and mix thoroughly in a spray bottle. Shake frequently during applications. After grooming or bathing, spray entire body, mane and tail. Rub in with clean towel or soft brush, following the direction of the coat. Spray additional amounts into manes, tails and other dry areas and work through for a more thorough conditioning treatment.

Ingredients: A paraben free proprietary blend of natural oils, lanolin and emulsifiers that, when mixed with water for efficient delivery, is a superior conditioner for coats, manes and tails.
