USES

	DOSAGE PER DAY	FREQUENCY
Adult horse	50 gr	3 days max

The doses can be doubled in case of high heat and/or intense efforts. Shake before use. Water available at all times. Check subsequent water consumption, if underconsumption is observed, consult a veterinarian. Close tightly after use. Store away from frost, heat and light; in a dry, ventilated and temperate place. Consult a feed expert or veterinarian for advice before using or extending the use of this feed.

The simultaneous use of different organic acids or their salts is contraindicated when one or more of them is used at or close to the maximum permitted level.

PRODUCT ADVANTAGES

- > Replenish electrolyte loss
- > Supports hydration maintenance
- > Highly absorbable by the body

TIPS FROM PASKACHEVAL

Studies have shown that horses given an electrolyte supplement prior to endurance-type exercise drank more water, lost less weight, and maintained higher blood sodium and chloride concentrations compared to unsupplemented horses.
