Itraconazole

20 mg/ml

with Prebiotic & Probiotic

ANTIFUNGAL
Oral Suspension

FOR VETERINARY USE ONLY

Each ml contains:

Itraconazole 20 mg, Flavored Base q.s.

Prebiotic: Fructooligosaccharides

Probiotic: Bifidobacterium Bifidum

Indication:

Itraconazole oral suspension, is recommended for treatment of fungal infections caused by microorganisms susceptible to Itraconazole, such as skin dermatophytosis caused by *Microsporum canis* in cats, dermatitis caused by *Malassezia pachydermatis* in dogs and systemic infections of fungal origin, such as, histoplasmosis, cryptococcosis, blastomycosis and sporotrichosis. Itraconazole is a broad-spectrum antifungal medicine that stops the growth of fungi. It provides relief from discomforting symptoms of fungal infections such as itching. Itraconazole can treat and slow down fungi growth in fungal infections affecting various body parts.

Dosage / Administration:

In dogs, the usual dose of 5 to 10mg/kg, one to two times per day orally. The dose for cats is 5 to 10 mg/kg every 12 to 24 hours. It is common for fungal infections to require several weeks of treatment.

Direction for Use:

Keep bottle tightly closed to preserve freshness.

Shake well before use.

Itraconazole should be given along with food containing more fat which helps in the absorption.

Precaution:

For Animal use only. Not for human use. Keep out of the reach of children.

Storage:

Store in a dry place. Protect from direct sunlight. Store at temperature below 30°C.

Do not freeze.

Shelf Life: 3 years from date of manufacturing.
