VETERINARY USE

REPELLENT FOR CATS AND DOGS

DESCRIPTION:

It is a solution with natural essences that works as an auxiliary method during the training period of a pet, it helps to prevent any pets or unknown animals from invading spaces or areas where they are not allowed to get close for any kind of territorial marking like: Gardens, plant pots, plants, carpets, etc.

The ammonium scent results unpleasant to most pets, which makes it easier to lead the animal to choose another spot for urination or defecation purposes.

INSTRUCTIONS FOR USE:

Apply a generous amount over the desired surface or area where you don't want the house pet to urinate or defecate. This has to be done from 3 to 4 times a day until the house pet or unknown animal stops trying.

ROUTE OF ADMINISTRATION:

On surfaces.

WARNINGS AND/OR RESTRICTIONS:

For direct application on surfaces only. Do not get the product near the eyes or mucosa. Avoid direct contact with the skin or clothes, and wash your hands after an application of the product. In case of accidental contact, wash the area that was in contact with the product for at least 15 minutes. In case of accidental ingestion, wash the mouth with water and DO NOT provoke vomit. Go with a medic and show him/her this label. If the house pet exhibits any kind of danger reaction, STOP using the product and consult your veterinary doctor. Do not use spaces used for storing or food processing areas. Once the product has been completely used, dispose of the bottle, but do not burn the container, this product is flammable. Keep in a dry, cool place, at a range within 15-30°C and protected against direct sunlight. Keep out of reach of children and pets. Any unused veterinary medicinal product, residues derived from it and empty containers must be disposed of safely and in accordance with local regulations, avoiding contaminating water sources.
