

Höveler mineral lick stone 2kg

Rich in minerals

When autumn arrives, it's time for the Höveler mineral lick. Compact and packed with everything your horse needs for autumn, while enjoying the last rays of sunshine in the paddock.

- ♥ Provides horses with essential minerals and trace elements
- ♥ Ideal supplement to pasture grass & basic feed
- ♥ Self-regulating intake as needed

Description▼

Remembering the summer, you want to ensure your horse is well cared for. When the grass in the paddocks is grazed down and the grazing season is almost over, the levels of vitamins, minerals, and nutrients are very low.

The Höveler lick block is an ideal supplement to pasture grass and allows for targeted mineral supplementation. It is suitable for all horses of all ages and, due to its calcium-to-phosphorus ratio of 3.5:1, can also be used with a hay/oat ration.

Recommended consumption▼

Due to the higher levels of additives (trace elements) compared to complete feeds, this supplementary feed may only be fed to horses up to 2.0% of the daily ration (88% dry matter).

Also helpful for...▼

For special nutrition/care in cases of
mineral deficiency
