

PASKAFRESH

COOLING GEL

PASKAFRESH is a non-greasy gel for external use, which locally cools the tissues of the horse. It contributes to the maintenance of the integrity of tendons and ligaments. Excellent alternative to clay. Does not contain menthol.

PRODUCT ADVANTAGES

- › Non-greasy gel with a cooling effect
- › Supports recovery of tendons and ligaments
- › Effective alternative to clay

TIPS FROM PASKACHEVAL

Ideal before and after physical effort, THERMOGEL prepares your horse's body for action and helps speed up muscle recovery thanks to its deep warming effect.

USES

After drying the hair, apply liberally onto the members, going along the tendon sheaths to the knees or hocks. PASKAFRESH can be used with bands. Caution: avoid mucous membranes, and apply only on clean tendons, free from open wounds.
