

PASKA'SAND

INTESTINAL TRANSIT

Psyllium's gelling properties enable the improvement of the digestive transit when it slows down (in case of sand colic for instance).

USES

	DOSAGE	FREQUENCY
Ingested sand	100 gr	50g at morning and 50g at evening
Preventive use	50 gr	25g at morning and 25g at evening

For ponies and foals, doses can be divided by 2.

PRODUCT ADVANTAGES

- Natural support for digestive comfort
- Helps improve digestive transit, especially in cases of sand ingestion
- Enriched with psyllium, known for its gelling properties

TIPS FROM PASKACHEVAL

Psyllium helps to trap ingested sand and support its elimination naturally, making PASKA'SAND an effective solution for horses at risk of eating sand.

RAW MATERIALS

Psyllium, corn cob. Product of the processing of crushed plants.

Additives (/kg)	Nutritional values (%)	
2B-FLAVOURINGS	Crude Ashes	3,50%
Aromatic substances	Crude Fiber	10,60%
	Crude Protein	6,70%
	Crude Fat	0,20%
	Natrium	0,30%

Palletization:

Buckets of 3 kg: 138 units per pallet
Buckets 20 kg : 24 units per pallet
