

PASKATONIC 912

MULTI-VITAMINATED SYRINGE

Support for weaning periods. PASKATONIC 912 brings trace chelates, amino acids and vitamins for the development of the foal

Chelated trace elements,
vitamins, essential amino
acids

USES

	DOSAGE PER DAY	FREQUENCY
Young foal	1 dose of 15 ml	Renew after 15 days, then 1 month later. Then, administer one syringe per foal per month.
Weaned foal	1 dose of 15 ml	1 dose per week, for 3 weeks

PRODUCT ADVANTAGES

- Enhances vitamin and mineral absorption
- Rich in essential amino acids for foal growth
- Convenient oral syringe for easy administration

TIPS FROM PASKACHEVAL

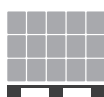

Foals have high requirements for amino acids, vitamins, and minerals to support the development of bones, muscles, and tissues. Deficiencies can lead to stunted growth, muscle issues, and bone health problems.

Ensure your foal receives a balanced diet and consider supplements like Paskatonic 912 to meet these critical nutritional needs.

RAW MATERIALS

Glycerin, Sodium chloride

Additives (/kg)		Additives (/kg)		Nutritional values (%)	
3A-VITAMINS		3B-TRACE ELEMENTS		Crude Protein	5,40%
Vitamin A (3a672b)	5 000 000 UI	Copper (Copper(II) chelate of glycine hydrate) (3b413)	300 mg	Crude Fiber	0,90%
Vitamin D3 (3a671)	333 333 UI	Zinc (Zinc chelate of glycine hydrate) (3b607)	600 mg	Crude Fat	1,90%
Vitamin E (3a700)	20 000 UI	Manganese (Manganese chelate of glycine hydrate) (3b506)	6 667 mg	Crude Ashes	6,00%
Vitamin B1 (3a821)	733 mg	Iron (Iron(II) chelate of glycine, hydrate) (3b108)	6 667 mg	Sodium	0,10%
Vitamin B2 (Riboflavin)	533 mg	Selenium (Sodium selenite) (3b801)	27 mg	Moisture	80,70%
Calcium D-Pantothenate	2 350 mg	3C-AMINO ACIDS			
Vitamin B12	6 mg	DL-methionine (3c11)	1 000 mg		
1A - CONSERVERS		L-Lysin monohydrochloride (3c322)	20 000 mg		
Potassium sorbate (1k202)	5 000 mg	L-Threonine (3c410)	10 000 mg		

Palletization:

15 ml syringe:
100 units per carton
/ 7,200 units per pallet
