

REFORMINLIQUID
ERGÄNZUNGSFUTTERMITTEL FÜR PFERDE

Original REFORMINLIQUID

Liquid vitamins and minerals.

Höveler Original REFORMINLIQUID was developed and tested by scientists in co-operation with experienced practitioners and represents an ideal alternative to conventional mineral and vitamin supplements.

The composition of REFORMINLIQUID is constantly reviewed and optimised as part of our quality management, as the vitality and performance of horses depend to a large extent on the supply of minerals and vitamins in line with their needs. REFORMINLIQUID makes an important contribution to this and should not be missing from any ration.

REFORMINLIQUID is the perfect alternative for horses that tend to select individual components out of the ration. Thanks to its composition, it can be easily mixed into any ration.

By preventing selection, REFORMINLIQUID makes an important contribution to the horse's mineral supplementation. In addition to being an excellent supplement to the basic feed, REFORMINLIQUID contains all vitamins and trace elements in concentrations that cover requirements.

Composition

Water, sucrose, dextrose

Ingredients

Moisture	51 %
Crude fat	0.6 %
